

TECHNICAL NOTES

Port Forwarding, Remote Management and Site Survey

For easiest port forwarding assignments and to enable remote management of OMNI-WiFi HotelSpots, be sure to enter the correct gateway information on the basic SETUP page in the CONTROL PANEL.

Through port forwarding you can do a site survey remotely by logging into the HotelSpot™ and visiting STATUS, WIRELESS, SITE SURVEY. This tool will indicate the presence of other access points that may cause interference to the OMNI-WiFi equipment if using the same channel.
