

# OMNI-WiFi™ Invoicing System

OMNI-WiFi's Invoicing System provides a reliable but economic method of hands-off automatic client authentication, credit card processing, and billing. This robust server is designed to manage these three critical functions, efficiently connecting wireless users to the Internet with any wireless access point. Functionally, this invoicing server is a radius server, a credit card processor, and a high-speed router with a firewall and NAT.

The invoicing server can connect up to 2,400 users simultaneously on a class B, IP network. The most versatile and most complete invoicing server available, this product is perfect for wireless ISPs, campgrounds, Internet cafés, and other Internet connection centers.

## Key Benefits:

- Connects any standard access point and 802.11 wireless client to the Internet.
- Adds security to any access point while maintaining the fastest speeds.
- Connects up to 48 access points to the Internet.
- Can connect 300, 600, 1,200 or up to 2,400 users to the Internet simultaneously.
- Maintains OMNI-WiFi's excellent access point signal strength.
- Preloaded software simplifies system set-up.
- Price includes custom configuration and three (3) hours technical support.
- Self-contained proven system.
- Includes all cables, and necessary switches.
- 24/7 technical support

## Standard Equipment:

- 1 preconfigured 2.4 ghz server
- Preloaded hotspot billing software
- 1GB DDR2 SDRAM
- 100GB hard drive
- Windows XP Professional
- 2 each 1GB Ethernet ports
- Easy-to-follow instructions

## Optional Equipment:

- Additional omnidirectional antenna
- Gigabit Ethernet switch for multiple access points
- Up to 2GB RAM
- Up to 250GB hard drive
- Redundant hard drive, with RAID-0 mirroring
- Up to 4 each 1-Gigabit Ethernet ports for AP clustering

## Ideal for:

- Wireless ISPs
- Hotels
- Internet Cafés
