

CondoSpot™

patent pending

OMNI-WiFi's CondoSpot™ provides economic broadband wireless Internet service to condominiums, while offering the greatest number of wireless connections for the lowest price today!

The CondoSpot™ is specifically designed to provide wireless signals in difficult environments, especially brick, concrete, or cinderblock-constructed buildings. The most versatile product of its type, it is ideal for multi-level condos and groups of condos.

Key Benefits:

- Connects clients via standard Wi-Fi drivers and adapters.
- Connects up to 50 concurrent users at 802.11g speeds.
- Provides excellent signal strength and reliability for almost every condos structure.
- Plug-and-play installation with clear instructions.
- Small, lightweight, self-contained, weather-tight system.
- Only 1 or 2 CondoSpot™ per building needed for most locations.
- Isolated power regulator provides superb reliability.
- MAC address automatic authentication system.
- 24/7 technical support.

Ideal for:

- Large and small condo buildings with multiple floors
- Brick, concrete, or cinderblock construction
- Indoor or outdoor use

Standard Equipment:

- 1 radio
- 1 180-degree directional 14 dbi antenna
- 1 Power-over-Ethernet (PoE) Injector
- 1 power supply, PoE splitter and regulator
- Up to 100 feet connecting cable
- Weather-tight enclosure

Optional Equipment:

- Additional 180-degree directional antenna
- 802.11/a radio
- Splash router to provide up to 100 total connections
- Robust router

Warranty Statement:

30-day money back guarantee.

2-year warranty on hardware including free technical support. Excludes physical and electrical damage.

Extended warranty available.
