

Virtual Private Network (VPN)

OMNI-WiFi's VPN is a state-of-the-art wireless system that securely connects two or more offices or networks up to 10 miles apart. Preconfigured with encryption security, the VPN is invisible to main or remote network users.

OMNI-WiFi's VPN is ideally suited for business parks and campuses where speed, reliability and security are significant concerns. This product offers indoor and outdoor, trouble-free connectivity. 24/7 technical support is offered.

Key Benefits:

- Connects main and remote networks together via encrypted 'invisible' wireless tunnels.
- Resources of main network become available to remote network users.
- Provides all users with excellent speed and connection reliability, regardless of location.
- Maintains long-range distances for which OMNI-WiFi is well known.
- Main network dhcp server will provide IP addresses to remote network users.
- Easy, flexible installation with clear instructions.
- If Internet is available at main network it can also be available to remote network users.
- Two isolated power regulators provide superior voltage control and network stability.

Standard Equipment:

- 2 radios
- 2 weather-tight enclosures
- 2 directional 14 to 19 dbi antennas
- 2 power regulators
- 2 Power-over-Ethernet (PoE)
- Up to 100 total feet Ethernet cables
- Preconfiguration and easy-to-read manual

Optional Equipment:

- Multiple radios or repeaters

Ideal for:

- Indoor/Outdoor use
- Businesses with multiple buildings
- Up to 30 concurrent connections

Warranty Statement:

30-day money back guarantee.

2-year warranty on hardware including free technical support. Excludes physical and electrical damage.

Extended warranty available.
