

OMNI-WiFi's WispSpot™ provides economic, broadband wireless Internet service to any wireless user within sight of the antenna, while offering the fastest speed at the highest output per dollar.

The WISPSpot™ is a complete system that allows users to become their own Wireless Internet Service Provider (WISP) and is ideal for rural areas where DSL or cable broadband connection is not available. Using optional client premises equipment, the range can be extended to eleven miles.

Key Benefits:

- Connects clients via standard Wi-Fi drivers and adapters.
- Modular design enables up to 240 concurrent connections.
- Provides all users with excellent signal strength and reliability regardless of location.
- Maintains long-range distances for which OMNI-WiFi is well known.
- Easy, flexible installation with clear instructions.
- Self-contained, weather-tight system.
- Orders of 3 radios or more include robust router at no extra charge.
- Up to twelve (12) isolated power regulators provide superior surge protection and redundancy.
- MAC address automatic authentication is standard.
- 24/7 technical support

Standard Equipment:

- 1 radio + 1 amplifier per antenna
- Patent-pending, customized flat panel antennas
- 60-degree to 120-degree directional 19 dbi antennas
- 1 PoE injector per WispSpot™
- Up to 100 feet connection wires/cables
- Weather-tight enclosures
- Two (2) regulators per WISPspot™

Optional Equipment:

- Additional 60- to 120-degree 19 dbi antennas
- Sector antennas for superior coverage
- Invoicing system
- Battery backup with lightning insurance

Ideal for:

- Rural areas without Internet connectivity
- Up to 240 concurrent connections per group of six WISPSpots™
- Long ranges

Warranty Statement:

30-day money back guarantee.

2-year warranty on hardware including free technical support. Excludes physical and electrical damage.

Extended warranty available.
