

OMNI-WiFi's CaféSpot™ provides economic, broadband wireless Internet service to cafés and small restaurants while offering the fastest speed at the highest output per dollar on the 802.11/b/g market today!

The CaféSpot™ is specifically designed to provide wireless signals in smaller food and beverage facilities and provides up to 50 simultaneous connections. The most versatile product of its type on the market, this product is ideal for small eateries and pubs that want to attract customers using their computers while relaxing.

Key Benefits:

- Connects clients via standard Wi-Fi adaptors.
- Proven to connect up to 40 concurrent users at twice the speed of most wireless systems.
- Provides users with excellent signal strength anywhere in the café.
- Can be mounted outside for long-range operation.
- Easy, flexible installation with clear instructions.
- Self-contained, weather-tight system.
- Isolated power regulator provides superior surge protection and redundancy.
- Built-in automatic authentication system.
- CaféSpot™ 'remembers' up to 1,000 wireless clients for fastest authentication.
- 24/7 technical support
